Profile

Software developer focused on full-stack web development with experience in React.js, Node.js, MySQL, JavaScript, TypeScript, SQL Server, ASP.NET, .NET, Csharp. Advanced student in Technical Development. Software developer with solid knowledge of clean architecture, SOLID principles, and dependency injection. Passionate about creating scalable, maintainable web applications focused on the user experience. In addition, I have experience in ERP environments (Dynamics 365 FO, X++, SQL Server), which gives me a Comprehensive view of business systems and business processes.

Education

School Cristo Rey <i>Humanities and Social Sciences</i>	Mar 2014 – Dic 2016
University of La Punta <i>Associate Degree in Software Development</i>	Mar 2018 – Present

Experience

Axxon Consulting <i>Solution Developer</i>	Jul 2023 - Feb 2025
<ul style="list-style-type: none">• Development of customizations in Dynamics 365 Finance and Operations ERP (X++ and SQL Server)• Implemented entities, forms, tables, and custom fields for billing and project management processes.• Creation and optimization of queries in SQL Server for internal reports.• I customized existing reports to meet business requirements, including sales consolidation by operating unit, cost center, and region.• Collaboration with multidisciplinary teams in improving operational flows for clients in different industries.	

Projects

Event Organizer

University

- CRUD for contacts, customers, and events.
- Development in Csharp.

Website

University

- Front-end development using HTML, CSS, and JavaScript.

Students Manager

Personal

- Development in .NET Core + EF Core + SQL Server, under Clean Architecture.
- I built a complete student management system applying Clean Architecture, SOLID principles, and dependency injection.
- (Pending) Unit testing with xUnit.
- Github: <https://github.com/Eros23z/Student-Management-.Net>

Marval

Axxon Consulting

- Solution Developer for Dynamics 365 FO (ERP).
- X++ for functionality development (forms, tables, entities).
- I worked with SQL Server for queries and reports.
- I implemented queries with insert recordset and different types of joins in X++ to extract data from sales transactions and organizational hierarchies.
- Reduction of errors in advance billing and optimization of expense recording in projects.
- Resolving performance issues such as SQLExecution Timeout by optimizing filters, join conditions, and report pagination.
- My impact: I contributed to the customization of financial/operational modules, ensuring that billing and customer data entry processes were more efficient.

Trombosis y trombofilia Argentina

Client - Trombosis y trombofilia Argentina

- Front-end development in HTML/CSS/JS/Bootstrap
- Development and optimization of an interactive contact module, incorporating form validation (HTML5) and anti-spam protection with Google reCAPTCHA v2.
- FormsSubmit.co was integrated as a backendless service for efficient email management, overcoming challenges in configuring redirects and excluding sensitive data from emails.
- <https://trombofiliaytrombosisargentina.netlify.app/>

Web Curriculum Vitae

Personal project

- Front-end development in HTML/CSS/JavaScript/React
- Development of my own interactive and dynamic resume, built from scratch.
- This project showcases my skills in front-end development, UI/UX design, and performance optimization. It features smooth navigation, scroll animations, and a modern, responsive design.
- <https://eros-zamora.netlify.app/>

Skills

- **Front-end:**
React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap
- **Back-end:**
.NET Core, ASP.NET, Node.js, Express.js
- **Databases:**
SQL Server, MySQL, Entity Framework Core, MongoDB.
- **Good practices:**
Clean Architecture, SOLID, Inyección de Dependencias
- **Concepts Architecture:**
APIs RESTful
- **Tools Version Control:**
Git, GitHub, Powershell, Postman

- **Methodologies:**

Agil, Scrum, Kanban

- **Extras:**

ERP Dynamics 365 FO (X++, SQL Server)

Languages: Spanish (native), English (B2)
