Profile

Versatile Full-Stack Developer with solid experience in both the .NET ecosystem (.NET 9, Blazor) and JavaScript (React, Node.js). Specialized in scalable enterprise application architecture, and passionate about implementing clean, scalable, and secure code following SOLID principles. I am looking Proven ability to build end-to-end applications applying SOLID principles, security, and modern best practices.

Web portfolio available with detailed technical breakdown and interactive demonstrations of all my developments.

Experience

Ceva Logistics | Fullstack .NET Development (Freelance)

Nov - Dic 2025

- **Enterprise Architecture:** Development of scalable WMS Lite with .NET 9, Blazor, and SQL Server, complying with rigorous security and corporate audit standards.
- **Data Engineering:** I designed a resilient Excel bulk ingestion engine with data cleansing algorithms, type validation, and automatic generation of discrepancy reports.
- **Security and Performance:** I implemented a static analysis environment with SonarQube on Docker, auditing and correcting critical vulnerabilities and Code Smells, raising the security and maintainability standard of the project for its move to production.

Full-Stack Development | Personal Project - P2P Rental App

Sep 2025

- **Architecture and Security:** Full-Stack development with PostgreSQL and RESTful API, secured by JWT (double token) authentication and HttpOnly anti-XSS/CSRF cookies.
- **Real-Time Features:** I implemented live chat with Socket.IO and the Mercado Pago payment gateway to facilitate instant negotiations and transactions.
- **Data Integrity:** I designed shift validation logic using unique security codes to ensure the physical delivery of assets.

Axxon Consulting | Solution developer

Jul 2023 - Feb 2025

- **I customized and extended Microsoft Dynamics 365 FO ERP** for clients in various industries, developing new functionalities with X++ and SQL Server.
- **I implemented** entities, forms, tables, and custom fields for billing and project management processes.
- **I optimized key financial reports**, improving query performance in SQL Server and providing stakeholders with more accessible data for decision-making.

Skills

- **Languages:**
C, JavaScript, TypeScript, SQL.
- **Front-end:**
React.js, Blazor (Server/WebAssembly), MudBlazor, Tailwind CSS, Bootstrap 5, HTML5, CSS3..
- **Back-end/ORM:**
.NET 9, ASP.NET Core, Node.js, Express.js, Entity Framework Core, Prisma ORM, JWT.
- **Databases:**
PostgreSQL, SQL Server, MySQL.

- **Architecture:**
Clean Architecture, SOLID Principles, Dependency Injection, Refactoring, Design Patterns, SonarQube (Análisis Estático).
- **DevOps and Tools:**
Docker (Containerization), Git, GitHub, IIS, Netlify, Postman, ThunderClient.
- **Libraries and Integrations:**
Mercado Pago SDK, Socket.IO, EPPlus (Excel), Nodemailer, APIs RESTful, WebSockets.
- **Methodologies:**
Ágil, Scrum, Kanban

Language: Español (nativo), Inglés (B2)

Education

Universidad de La Punta
Technical Degree in Software Development

Mar 2018 – Etapa final
